Cable Transfer
AMS CT20

A safe transfer for all cables within a system.

The **AMS CT20** cable transfer offers flexibility with a 20mm internal dimension spring. This allows additional cables to be pulled through the spring in applications that require multiple cables.

Spring retracts into casing when door is closed.

HIGHLIGHTING FEATURES

- 20mm internal dimensions
- Able to take all cables
- Suitable for use with double doors

COMPATIBILITY

- Can be used with timber or aluminium doors

CONSTRUCTION

- Mild steel chrome plated box
- Sprung steel chrome plated spring

DIMENSIONS

- Casing - 290mm long x 25mm wide x 16 deep
- Spring – 180mm long
- Diameter – 20mm internal and external

INSTALLATION

- Mortised into the edge of a timber or aluminium door on the hinge side
- The spring is attached to the door and frame with screws provided
APPLICATIONS

- Used in applications where the door has been core drilled for electrical cabling
- In a double-door installation where the fixed leaf must be core drilled for an electric strike or an AMS lock monitoring box
- The cable transfer is concealed on the hinge side of the door and is not visible until the door has been opened
- Can be used on 180° opening doors
