Perimeter Security Door Solution

PSDS

The global standard in security hardware solutions

Perimeter Security Door Solution
PSDS

All in one security solution.

The **AMS Australia Perimeter Security Door Solution** is a complete security solution in one package. The door and hardware are pre-fitted and wired in the factory which means that less time is required on installation. The "H" frame has adjustable legs so it can be bolted from slab to slab. This allows for varying frame heights.

The door is glazed steel with the sections taking full size SCEC Endorsed locks. The glazing includes laminated glass with 11mil security film added to comply with specifications. The door can be automated for disabled access or to meet BCA standards. Both single and double door configurations are available as a custom made product.
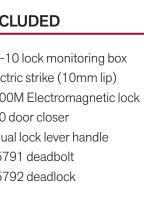

SCEC ENDORSED

PATENTED

STRUCTURAL FEATURES
